Dear Rick and Rosemary

Here is our revised Engineer's report which we believe complies with any and all concerns the City Attorney and City Clerk will have regarding the new Management District plan.

We realize that you took almost 10 weeks to give the first comments to our ER and MDP, while the other management plan was approved, from first submittal to final approval- in a record five weeks.

We also realize that you have required wording and explanations in our plan that the other Art District management plan was not required to comply with. We stated this in our phone call with you on December 3rd.

However, be that as it may, here is our revised plan. We believe that we have more than fulfilled all of the concerns that your office and the City Attorney's office may have regarding our management district plan and Engineer's report.

We trust that you will expedite the review and approval of this plan and look forward to initiating our petition drive in early January.

PLEASE CONFIRM RECEIPT.

Thanks

Marco Li Mandri
